

HB 423 -- State School Aid for At-Risk Students

Co-Sponsors: Icet, St. Onge, Jackson, Avery, Stefanick,  
Cunningham (86)

This bill corrects an anomaly in the calculation of at-risk funding that currently prevents certain districts from realizing the benefit of an operating levy above \$2.75. The bill also requires that the 1997-1998 per eligible pupil amount of at-risk funding available to hold-harmless districts be recalculated to exclude voluntary transfer students originally included in the calculation, thereby permitting these districts to get the benefit of growth in the number of resident pupils without measuring from an artificially inflated base.
