

SCS HCS HB 1192 -- MEAT INSPECTIONS AND ANIMAL HEALTH

This bill requires the Director of the Department of Agriculture to promulgate rules consistent with the Federal Meat Inspection Act, the Federal Poultry Products Inspection Act, and all related federal regulations necessary to implement the meat inspection programs of the state.

Currently, donated venison must be processed in a facility that is inspected by the United States Department of Agriculture. The bill allows it to be inspected by either the United States Department of Agriculture or the Missouri Department of Agriculture.

Obsolete provisions regarding animal health are repealed.
