

HB 1333 -- Counting Pupils for State School Aid

Sponsor: Jackson

Currently, school districts may use the number of eligible pupils for the ensuing school year or either of the two preceding school years as the basis for their state school aid. This bill limits the choice of these years to the pupil counts for the minimum school term, rather than the entire year; and beginning in the 2004-2005 school year, the summer school add-on will include only those pupils that attend summer school in the ensuing year.
