

HB 202 -- County 911 Addressing

Sponsor: Sander

This bill requires all counties, excluding the City of St. Louis, to establish and maintain 911 addressing where enhanced 911 service has been approved, including areas within municipalities. The county governing body may delegate the 911 addressing authority within a municipality to its governing body. The assigned 911 address will become the official address, and the cost of materials related to road sign changes will be funded by 911 revenues. Any database information held by any emergency telephone service will be confidential, nonpublic information.
