

SCS HB 257 -- RECLASSIFICATION OF LINCOLN COUNTY

Currently, counties can change classification only after their assessed valuation qualifies for the new classification for five successive years, except that any county may become a first classification county at any time after it reaches the required assessed valuation and the county governing body elects to change classification. This bill allows Lincoln County to become a second classification county upon reaching the required assessed valuation and approval from the governing body effective at the beginning of the county's fiscal year following approval by the governing body.
