

HB 2468 -- Missouri Freedom to Own Lightbulbs Act

Sponsor: Davis

This bill establishes the Missouri Freedom to Own Lightbulbs Act which specifies that a lightbulb or lightbulb accessory that is manufactured in Missouri and remains within the borders of Missouri is not subject to federal law or regulation, including registration, under the authority of the United States Congress to regulate interstate commerce. This applies to a lightbulb or lightbulb accessory that is manufactured in Missouri from basic materials and that can be manufactured without the inclusion of any significant imported parts. The authority of the United States Congress to regulate interstate commerce in basic materials does not include the authority to regulate lightbulbs or lightbulb accessories made in Missouri from those materials.

A lightbulb manufactured or sold in Missouri under these provisions must have the words "Made in Missouri" clearly stamped.
