

FIRST REGULAR SESSION
HOUSE COMMITTEE SUBSTITUTE FOR

House Concurrent Resolution No. 17

96TH GENERAL ASSEMBLY

0884L.03C

D. ADAM CRUMBLISS, Chief Clerk

2 **WHEREAS**, the United States Corps of Engineers' five-year study of the Upper
3 Mississippi River Basin, which is everything north of Cairo, Illinois, failed to produce a plan for
4 flood control acceptable to all stakeholders; and

5 **WHEREAS**, the Mississippi River Commission did recommend Plan H to the United
6 States Congress; and

7
8 **WHEREAS**, the Corps of Engineers has not recommended this plan to the United States
9 Congress, citing the expense of the construction of 500-year levees along these Rivers (estimated
10 to be \$6 billion) as it does not meet current cost-benefit guidelines for federal funding; and

11
12 **WHEREAS**, the Corps of Engineers additionally determined a need for a better data
13 based upon new hydrology and flow studies and the need to study tributaries to the Mississippi
14 River; and

15
16 **WHEREAS**, the Corps of Engineers indicated that ramifications of the additional 500-
17 year levees and their potential to cause additional flooding would need to be determined, and
18 affected populations and communities informed and advised of the potential impact; and

19
20 **WHEREAS**, the affected counties include the Missouri counties of Lincoln, Pike, and
21 St Charles; and

22
23 **WHEREAS**, Plan H designates only about half of the levees in the Missouri counties of
24 Lincoln, Pike, and St. Charles be raised, while to the north a higher percentage of 500-year levees
25 are recommended for both sides of the River; and

26
27 **WHEREAS**, the stakeholders in the Missouri counties of Lincoln, Pike, and St. Charles
28 desire the protections provided by the 500-year levees; and

29

30 **WHEREAS**, the proposed Plan H, if implemented, denies the benefits of 500-year levees
31 to those making a living along the Mississippi River, negatively impacting agriculture,
32 transportation, businesses, industries, tourism, hunting, fishing, boating, infrastructures, and
33 residences; and

34

35 **WHEREAS**, over 6,500 citizens have signed petitions opposing the proposed Plan H;
36 and

37

38 **WHEREAS**, the Upper Mississippi River Basin should receive funding comparable to
39 funding for the Southern Mississippi River Basin from Cairo, Illinois, to New Orleans,
40 Louisiana:

41

42 **NOW, THEREFORE, BE IT RESOLVED** that the members of the House of
43 Representatives of the Ninety-sixth General Assembly, First Regular Session, the Senate
44 concurring therein, hereby strongly urge the United States Congress to support a comprehensive
45 plan for the Upper Mississippi River Basin that enhances system-wide flood control without
46 creating adverse impacts on existing levees, levee districts, rural communities, and metropolitan
47 areas. The plan should be based on analysis that quantify the impacts of enhanced flood control
48 measures and acknowledges the importance of keeping agricultural land in production. The
49 proposed Plan H is totally unacceptable to Lincoln, Pike, and St. Charles Counties and we ask
50 the Missouri Congressional Delegation to support modifications of the comprehensive plan, by
51 the Corps of Engineers, to this plan; and

52

53 **BE IT FURTHER RESOLVED** that the Chief Clerk of the Missouri House of
54 Representatives be instructed to prepare properly inscribed copies of this resolution for each
55 member of the Missouri Congressional Delegation.
