

HB 1602 -- School Cleaning Supplies

Sponsor: Wyatt

This bill requires each school district to establish a "green" cleaning policy and buy and use only environmentally-sensitive cleaning products that meet the guidelines of the bill, beginning in school year 2013-14. If a district determines that a green cleaning policy is not economically feasible because of increased costs, not including staff training costs, it must provide annual written notice to the Department of Elementary and Secondary Education.
