

HB 1892 -- Salvage Certificate of Title

Sponsor: Asbury

This bill allows any person who purchases a motor vehicle with a certificate of destruction, junking certificate, salvage certificate, or equivalent issued by another state to make an application to the Department of Revenue for a salvage certificate of title after having the required vehicle inspection under Section 301.190, RSMo.

The application for title must be accompanied by a statement explaining the circumstances by which the property came into the owner's possession; the year, make, model, and vehicle identification number; the vehicle's current location; its retail value; the vehicle inspection report; and the required fee. After all the requirements have been satisfied, the department director must issue an original certificate of title designated as prior salvage or a salvage certificate of title designated "salvage" or junking certificate based on the condition of the property as stated in the inspection report.
