

HB 2037 -- Transitional School District of the City of St. Louis

Sponsor: Kratky

The special administrative board of the Transitional School District of the City of St. Louis is authorized to explore alternative forms of governance for the district. This bill specifies that the exploration include the development of a plan to divide the district into four subdistricts, each developed around a high school and its feeder middle and elementary schools but sharing the tax base of the St. Louis City School District. The plan must be submitted to district voters no later than the general election of 2013. The board must ensure that state school aid is distributed to the subdistricts based on weighted average daily attendance.
