

HB 787 -- License Information Privacy

Sponsor: Richardson

This bill prohibits the Department of Revenue from retaining copies, in any format, of source documents presented by an individual applying for or holding a driver's or nondriver's license. In addition, the department must not capture digital images of source documents that are capable of being retained in electronic storage in a transferable format.

By September 11, 2013, the department must securely destroy any source documents that have been obtained from driver's or nondriver's license applicants.

The bill defines "source documents" as original or certified copies of documents presented by an applicant as required under federal law to the department to apply for a driver's or nondriver's license or under state law for the issuance, renewal, or replacement of driver's or nondriver's licenses.
