

HB 862 -- Case Management Systems

Sponsor: Hubbard

This bill specifies that a party to a civil case may file a petition with the presiding court seven years after final judgment to have all court records, including transcripts and docket entries pertaining to the proceeding, removed from any automated case management system available to the public, including Casenet. Upon receiving the petition, the court must remove the specified civil court records from the automated case management system. The removal of the records from the case management system must not be considered an order sealing the case records or an expungement.
