

HB 1249 -- SCHOOL PURCHASES

SPONSOR: Wood

Currently, school district employees who do not serve in an administrative or executive capacity are precluded from providing services or property to the school district. This bill allows such services and sales when they fall below specified amounts unless the transactions are made by contract that has been through a notice or bid process. The bill also revises a penalty provision for purchasing violations that applies to school districts in second, third, and fourth class counties to school districts in first class counties as well.
