

HB 90 -- MENTAL HEALTH COMMISSION

SPONSOR: Berry

This bill changes the members required to serve on the Mental Health Commission. Currently, the commission must include a physician recognized as an expert in the evaluation or habilitation of persons with an intellectual disability or developmental disability. The bill changes this provision to require a physician, licensed clinical psychologist, or other licensed clinician and specifies he or she must be recognized as an expert in the evaluation or treatment of persons with an intellectual disability or developmental disability.
