

HB 534 -- RIGHT TURNS AT A RED LIGHT

SPONSOR: Korman

This bill repeals the provision requiring the driver of a vehicle to come to a full and complete stop before cautiously entering an intersection to make a right turn at a red traffic control signal except at specified intersections. The bill requires the driver to slow to a speed that is deemed safe when considering the number of moving vehicles at the intersection in motion before cautiously entering an intersection to make a right turn at a red traffic control signal except at specified intersections.
