

HB 733 -- DNA PROFILING SYSTEM

SPONSOR: Anders

Currently, every individual who is seventeen years of age or older and arrested for first degree burglary, second degree burglary, or a felony offense under Chapters 565, 566, 567, 568, or 573, RSMo, must have a fingerprint and blood or scientifically accepted biological sample collected for purposes of DNA profiling analysis. This bill changes the provisions to require every individual who is 17 years of age or older and arrested for any felony offense to have a finger print and blood or scientifically accepted biological sample collected for purposes of DNA profiling analysis. The bill requires the use of the buccal swab method for collecting DNA from persons required to provide samples for the DNA profiling system.
