

HB 1980 -- MISSOURI AIR CONSERVATION COMMISSION

SPONSOR: McCreery

Currently, the Missouri Air Conservation Commission is prohibited from enacting rules or regulations stricter than those required by the federal Clean Air Act or enforce the standards or guidelines earlier than required by the act. This bill allows the commission to enact rules and regulations stricter than those required by the Clean Air Act or with earlier compliance deadlines if the commission determines that the stricter standards and guidelines would provide substantial additional economic, employment, or environmental benefits beyond the benefits that would have resulted from the minimal compliance.

This bill is the same as HB 821 (2015).
