

HB 2556 -- PROPERTY ASSESSMENT CLEAN ENERGY ACT

SPONSOR: Dugger

This bill changes the laws regarding the Property Assessment Clean Energy Act by increasing the period of time in an assessment contract with the clean energy development board that a property owner agrees to pay an annual assessment in exchange for financing from 20 to 25 years, adding facilities providing for water conservation or pollutant control to the list of energy efficiency improvements, and allowing the clean energy development board the option to collect the property tax or have the county collector continue to collect the property tax.
