

HB 2689 -- STATE ENERGY POLICY

SPONSOR: Miller

This bill specifies that it is the policy of the state to modernize the regulatory process for electrical corporations to more closely align the interests of electrical corporations and the customers they serve.

The Division of Energy must review and update if necessary the Comprehensive State Energy Plan implemented by the division by January 1, 2017, and biennially thereafter. The division must review the plan to ensure it meets specified criteria. To conduct the review, the division must use a diverse stakeholder system or contract with a Missouri-based not-for-profit organization who meets specific requirements. The division must issue a report, along with the review, that suggests policy changes needed to meet set criteria.
