FISCAL ANALYSIS

ASSUMPTION

Section 523.039 - Compensation for Agricultural and Horticultural Land

Officials from the **Missouri Department of Transportation**, the **Attorney General's Office**, the **Department of Commerce and Insurance**, the **Department of Natural Resources**, the **Office of Administration** and the **Hancock Street Light District** each assume the proposal will have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

Oversight notes the changes in the House Committee Substitute compared to the original language has changed the impact to the State Road Fund that was in the original fiscal note.

In response to a previous version, officials from the **Metropolitan St. Louis Sewer District**, the **South River Drainage District** and the **Wayne County Pwsd** assume the proposal will have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

Oversight only reflects the responses received from state agencies and political subdivisions; however, other utilities were requested to respond to this proposed legislation but did not. A listing of political subdivisions included in the Missouri Legislative Information system (MOLIS) database is available upon request.

Oversight assumes this proposal could impact the Grain Belt Express project in northern Missouri. According to a report by the Public Service Commission (File No. EM-2019-0150), the Grain Belt Express Project line is "sited to traverse Buchanan, Clinton Caldwell, Carroll, Chariton, Randolph, Monroe and Ralls Counties, Missouri. The Grain Belt Express Project covers approximately 780 miles, and the project will primarily use a pole design which has a smaller footprint than traditional alternating current transmission lines. The structures will occupy ten acres for the entire state of Missouri." The Joint Application of Invenergy Transmission LLC, Invenergy Investment Company LLC, Grain Belt Express Clean Line LLC and Grain Belt Express Holding LLC for an Order Approving the Acquisition by Invenergy Transmission LLC of Grain Belt Express Clean Line LLC was approved by the PSC effective June 30, 2019.

Oversight notes modifying provisions relating to the power of eminent domain for utility purposes could have a large impact on current and future utility projects.

FISCAL IMPACT – Small Business

Small businesses that are impacted by eminent domain could be impacted by this proposal.

FISCAL DESCRIPTION

This bill specifies that, before the Public Service Commission (PSC) issues an approval for the construction of certain utility infrastructure, the utility corporation must provide the PSC with a resolution of support passed by the county commission in each county through which the merchant line will operate.

The bill also specifies that in condemnation proceedings, just compensation for agricultural or horticultural land shall begin with 150% of fair market value for the most productive category of land and decrease by 5% for each category thereafter. In a condemnation proceeding for agricultural or horticultural land in which a court appoints three disinterested commissioners, the commissioners must be a county commissioner, a farmer who has been farming in the county for at least 10 years, and a state licensed or state-certified appraiser.

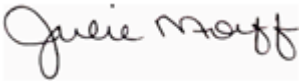

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
