As a resident of Missouri, I have watched citizens in other states lose their rights - often leaving their civil liberties in tatters, over unscientific and false pandemic narratives. This legislation protects the rights and liberties of MO residents in a time when it is needed the most and I am proud to support it.

I strongly support HB1691. Last year, I and my husband faced job termination due to mandatory COVID19 vaccination with no options for testing. We were forced to look for a job in a state, where state representatives already blocked the unlawful mandatory vaccinations in order to work. Living in a fear of losing income to feed our family, health insurance and the jobs we used to enjoy is the worst nightmare of an employee and a parent. Many coworkers forced themselves to get the COVID19 shot, they didn't need already having herd immunity, but had to get it in order to work to feed their children. These EUA shots are truly experimental and nobody should be forced to be injected with them in order to support family's needs. Requirement for any individual to be vaccinated against COVID-19 for employment or participation at a school, university or other institution violates federal law 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(III), which requires that the person to whom an EUA vaccine is administered be advised, "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." The reason for the right of refusal stems from the fact that EUA products are by definition experimental. Phase III clinical trials for the Pfizer vaccine do not end until May 2, 2023 and for the Moderna vaccine until October 27, 2022. EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is "absolutely essential." BioNTech received FDA approval for people ages 16 and above under the name Comirnaty, but there are no Comirnaty doses available in the United States; therefore there is currently NO FDA approved COVID-19 injection available anywhere in the United States. Every COVID shot in America remains under the EUA law and thus people have the "option to accept or refuse". It is typical for vaccines to be in clinical trials for 6-10 years before licensure; COVID vaccines have been in trials for a matter of months. We do not have long-term safety data, and the short-term data indicate alarming injury and death rates, unprecedented for any other licensed vaccine. The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates.

I am in support to requiring employer who mandate my health to be responsible for any consequences of these shots. I have systemic auto immune diseases for my military service at Ft McClellan, AL. These shots increase these conditions. Furthermore, there is no data to support these shots. All studies have been tainted. They do not follow scientific theory.

I am in support of any bill that bans schools, businesses, venues or public transportation from requiring vaccination, proof of vaccination, vaccination "passports" or any requirement such as proof of natural immunity as a condition of employment or attendance. Personal health information is just that - very personal and private and should never be required to be shared. I am also in support of any bill that bans schools from endorsing, providing or otherwise having any involvement in any vaccination or medical treatment. Businesses and schools should not ever have the power to infringe upon my personal health decisions or the health decisions of my children. If we cannot have control over our own medical decisions and the right to decide what medical treatments or vaccinations we will participate in, then we lose all rights to our bodies and become prisoners of the state.

I oppose this bill. This bill should be renamed The Denying The Role Of Vaccines In Public Health Act. I count at least 19 bills submitted to the Judiciary Committee this session devoted to undermining the health and safety of Missourians. Shame on the legislators who are pandering to those who wish to divide us by spreading falsehoods and inaccuracies regarding vaccines and public health. If we can't come together to fight a common enemy (currently Covid19) then our future truly looks bleak. These bills are divisive and dangerous.

Good morning, Representative Evans and members of the House Judiciary Committee. My name is Laura Turner. I am the Senior Manager, Advocacy - Missouri and Arkansas, for the American Lung Association. The American Lung Association is offering testimony in opposition to HB 1691. The American Lung Association is the nation's oldest voluntary public health organization with a mission to save lives by improving lung health and preventing lung disease. We do this through education, advocacy, and research on behalf of the 36 million Americans living with lung diseases including lung cancer and COPD. When we found ourselves in the midst of a respiratory pandemic in 2020, the American Lung Association knew we had an important role. We launched a \$25 million campaign to end COVID-19 and defend against future respiratory virus pandemics, funding research awards and grants for preventative research as well as working to evaluate the effects of COVID-19 on patients with chronic lung disease. We have worked in coalition with government, private industry, and public health organizations to address this pandemic on every level. Throughout our nation's history, vaccinations have been an important tool to save countless lives and eradicate deadly disease from smallpox to the flu and now they are an important tool to help us address the pandemic we face today. In a pandemic, time is measured in lives lost and people left with severe, debilitating health effects. The sooner every Missourian and American gets fully vaccinated, the better chance we stand of ending the pandemic and moving our state and nation forward. If passed, this bill will derail our efforts and threaten the health of the 1,082,000 Missourians living with lung disease. Our public policies should focus on ensuring everyone is vaccinated. Over 206 million people in the United States are fully vaccinated, and billions of people worldwide have received a COVID-19 vaccine (1). The vaccines have undergone the most intensive safety monitoring in U.S. history and claims that they are not extensively tested are false. The evidence is clear that they reduce the risk of hospitalizations and deaths from COVID-19, as well as the risk of contracting and spreading the virus (2). As the trusted champion for lung health, the American Lung Association is focused on slowing the spread and defeating COVID-19. To further protect the overall population and those most vulnerable, we need a sufficiently high proportion of the population to get vaccinated to stop coronavirus transmission. We hope you will work to protect the health and safety of all Missourians by encouraging everyone to get vaccinated and boosted and reject policies that slow the uptake of vaccinations and spread false information about their safety. For those reasons we strongly urge you to oppose HB 1691.1.

Why are you tying the hands of employers. This legislation may take away the ability of some employers to do business with their customers/clients that require these types of covid monitoring/vaccinations. Even if you try to make it illegal to make these stipulations in Missouri, you then limit who Missouri employers can do business with outside of the state. You could also be requiring employers from doing something illegal. Finally, Missouri is an "at-will employment" state. Why would you want to be placing limitations on an employer concerning who he hires and fires? This is very bad legislation!

Chairman Evans, Vice-Chairman Veit, members of the committee; thank you for the opportunity to submit testimony today in opposition to HB 1691 which seeks to intimidate Missouri business owners and employees out of taking measures to protect themselves and their families during a global and local public health crisis. Pro-Choice Missouri works to protect and expand every Missourian's right to bodily autonomy, to access essential reproductive healthcare, to access accurate information in order to make the best decisions for ourselves and our families, and to parent our children in safety and dignity. Moreover, we work to ensure reproductive justice for all Missourians, which involves advocating to reduce disparities based on race, income level, insurance coverage status, and other factors. Living together in community, as we do here in Missouri, requires each of us to do our part in supporting, uplifting, and protecting that community. The health and prosperity of the community is directly linked to our individual health and prosperity as well as that of our future generations. This bill will particularly impact Missouri communities that are already facing extreme disparities in access to health care, and are in especially vulnerable circumstances due to the COVID-19 pandemic. As community members and leaders, this body should be prioritizing improving the health and well-being of the community and not on politicizing public health measures that have been proven to improve community health. During this unprecedented pandemic, our elected officials should be focused on improving our families' health and safety, not politicizing regard for public health. This bill will have lasting negative impacts on Missouri people, children, and families. Pro-Choice Missouri, representing more than 70,000 members across the state, opposes the advancement of this bill, and urges you to vote NO today.

Given the vulnerable population residing in nursing homes, nursing homes need to be able to determine the best and safest policies regarding vaccination and other infection control protocols to protect staff and residents. In addition, we need to be able to react to federal guidance and requirements. Hard line statutory restriction that conflict with federal guidance and regulations would put us out of compliance with CMS and possibly force closure of nursing homes.

Missouri State Medical Association would like to go on record in opposition of House Bills 1861, 1575, 2093, 1465, 1617, 1485, 1543, 1544, 1769, 2055, 1635, 1665, 1670, 1691, 1692, 1475, 1624, 1904 and 1762. MSMA feels that these bills seek to make it more difficult for employers to adopt a COVID vaccine requirement. Employers, particularly employers within the health care industry, need the ability to require staff to receive a vaccine in order to better protect both the employee and patients. Businesses should have the ability to assess situations and decide.

Normally, discrimination statutes have protected classes based on factors that are inherent to an individual, such as religion. However, vaccination status is something an individual can control and would not be classified as a protected class.

What has been happening in our country and in many other parts of the world in the name of health and science is a tragedy and we have only as of yet begun to taste the bitterness of said tragedy. Further steps down this path will only ensure more death and increased and unnecessary suffering. Please vote to protect individuals against the tyranny of the government in imposing or allowing others to impose a pharmaceutical tyranny which is actively coming between a person and their health care advisor. No person should be forced to give up rights, submit to invasive procedures or be otherwise coerced against their will to submit to any medical procedure, not least of which to those of us with natural immunity and especially those of us with a history of adverse reactions to pharmaceuticals. Please help ensure that courageous doctors who have bravely stood up against captured entities wishing to take away their licenses for acting in their patient's best interest will not continue to face persecution. Please help stand for nurses who have seen first hand the dangers these so-called "safe and effective" "vaccines" pose to those who take them, a vaccine so lacking in immune-inducing responses that the definition itself had to be changed in order to call them as such. Are we to gaslight and ignore the very people we are told to trust with our health that they do not know and can make decisions as to what is in the best interest of their own body and health? Please help children not be ostracized by being subjected to forced quarantine and isolation from classmates and teachers, even when healthy and testing negative, simply because they were not subjected to a gene therapy injection of which we have zero long term safety studies. We have long known that children were not the drivers of the pandemic and that children are by far less at risk from an unhealthy outcome from the virus as they are from either the vaccine or the devastating psychological, social and spiritual effects of policies made in response to the pandemic. Please stop testing and quarantining healthy individuals, yet forcing sick vaccinated doctors and nurses back to work. ("Stressed hospitals are asking workers with covid to return — even if they may be infectious" <https://www.washingtonpost.com/health/2022/01/23/hospital-workers-covid-isolation-cdc/>) If this were all about health and safety, why are the healthy unvaccinated not allowed to work, but the sick vaccinated are being forced back into the very places that say they are striving to save the most vulnerable among us? Furthermore, have we learned nothing from history? We have thrown all we know out of the window and blinded ourselves to any solution save the one and only one. Why? How many individuals must be sacrificed to achieve a non-existent (by definition) medical Utopia? Where are our protections to life, liberty, and the pursuit of happiness, freedom from coercion from forced medical experimentation as stated in the Nuremberg Code, and the universal standards in ethics as found in the Universal Declaration on Bioethics and Human Rights? Need one only create the right atmosphere of fear in which to manipulate the masses in order to throw out all that is good, all that we have learned from mistakes in the past, and all that we had hoped to prevent as mistakes for the future? Finally, quashed information and purposeful lack of collecting pertinent data has lead many to

make choices that have otherwise left them having been harmed, with no liability protections against those forcing them to undergo the procedure. Science publishing and pharmaceutical misdeeds were prevalent long before the pandemic. The tragedy here lies in government policies which forced people to have less than desirable outcomes, whether by not allowing treatments which work, by giving treatments that cause harm, by skipping steps in the regulatory process, or by forcing a one size fits all medical procedure that was improperly tested on to millions of people worldwide. We need to stop this madness post haste. Thank you for your consideration.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

LeadingAge Missouri (LA MO) is an association of 130 mostly non-profit senior living and healthcare providers across Missouri. LA MO members deliver the full continuum of aging services, including nursing home care, assisted living, hospice, home & community-based services, adult day care and affordable and market rate senior housing. Usually, a LA MO member delivers multiple levels of senior care and aging services in a single building or on a single campus. Many settings for senior care and aging services in Missouri are certified by the Centers for Medicare & Medicaid Services (CMS). This includes the vast majority of Missouri nursing homes, immediate care facilities, hospices, and home & community-based service providers. CMS certification allows senior care providers to be reimbursed by CMS for Medicare or Medicaid patient care and services. To highlight the significance of this, in Missouri the average nursing home receives more than 65% of its revenue from CMS reimbursement. Accordingly, there is little doubt that large numbers of Missouri nursing homes, intermediate care facilities, hospices and home care providers will fail without CMS payments - leaving thousands of vulnerable, older Missouri citizens without care services and thousands of Missouri aging services providers without work. In the case of nursing homes, they are frequently one of the largest employers in smaller Missouri communities. Without question, large scale nursing home closure in Missouri would be devastating for Missouri citizens (both residents and families) and the State's economy, and with thousands of displaced older Missourians there would be a social crisis of substantial proportions. Missouri aging services organization must comply with CMS requirements to remain financially viable and serve Missouri citizens. Recently, CMS issued an Interim Final Rule (IFR) mandating all staff in CMS-certified facilities to be fully vaccinated for COVID-19. Missouri and other states challenged CMS' authority and rationale for the IFR and, initially, lower federal courts enjoined enforcement of the CMS rule. However, the U.S. Supreme Court recently overruled lower courts in favor of CMS and ended the IFR's stay of enforcement while the cases proceed in the lower courts. Consequently, staff (broadly defined in the IFR) in all Missouri CMS-certified facilities will soon be required to be fully vaccinated for COVID-19. There two exemptions to the IFR for facility staff - medical contraindication and sincerely held religious belief, practice, or observance. These two exemptions require application and approval consistent with CMS guidance. The CMS IFR preempts contradictory state or local law. Accordingly, Missouri may not overrule the vaccination mandate applied to CMS-certified facility workers. States may legislate for more restrictive application of a federal law but may not diminish or dilute federal requirements. LeadingAge Missouri believes Missouri may not authorize additional exemptions to the CMS mandate beyond the two specifically authorized. Additionally state authorized exemptions would dilute application of the CMS vaccination mandate. The CMS IFR broadly applies to all "staff", which includes employees, licensed practitioners, students, trainees, volunteers, contracted staff, and any individual providing care, treatment, or

services under contract or other arrangement. The IFR recognizes the vaccination requirement does not apply to workers who perform 100% remote work or telework and who have absolutely no contact with patients/residents/participants or other staff. However, employees and individuals who have any contact with other staff must be vaccinated, regardless of whether they have contact with patients/residents/participants. This means that, except in rare cases, all employees of senior living and healthcare communities - whether working in the CMS-certified care settings or not - will have to be vaccinated or meet one of the two exemptions from vaccination. Large numbers of Missouri senior living and healthcare facilities offer multiple levels of senior care where CMS-certified nursing staff routinely engage with staff in other non-CMS-certified settings. For example, hundreds of Missouri facilities (especially in smaller communities) provide both nursing care and assisted living care in the same structure – often in different hallways on the same facility floor. Routinely, nursing home and assisted living staff serve both nursing home and assisted living residents. Both assisted living and nursing care are Missouri-licensed long-term care providers, however, only nursing homes are CMS-certified. For this reason, LA MO believes providers of aging services that are not CMS-certified (like ALFs and independent living units on the same campus as CMS-certified operations) must be exempted from any state law that would impede or restrict aging services providers from delivering the safest, best care and services to Missourians entrusted to them. Aging services providers serve, protect, and care for Missouri's most vulnerable population – those 65 and older – who often have underlying healthcare conditions and who are overwhelmingly the most susceptible to negative health consequences or death from COVID-19. To protect Missourians entrusted to their care, and to provide the safest, best senior care and services possible, Missouri aging services providers must be afforded professional discretionary flexibility to “do no harm” to patients and residents by ensuring that aging services personnel caring for members of the most vulnerable population do not transmit COVID-19 to those for whom they are providing comfort, care, and services. Aging services providers should be left to exercise professional judgement – based on verifiable science, accepted healthcare practices and protocols, and competitive market forces that dictate healthcare delivery – on how to deliver the safest and best care, comfort and services to Missouri's highly vulnerable patients and residents in different settings. Having said this, it is highly likely that aging services providers operating CMS-certified facilities (with overlapping employees) will uniformly apply the workforce COVID-19 vaccination mandate to all staff – not just those impacted by the broadly inclusive IFR. These providers should be left to do so in the best interests of their residents and patients. The State should tell a provider that it should or should not require staff vaccination for COVID-19. However, LA MO offers no expertise or opinion to Missouri policymakers about appropriate workforce policies and practices for Missouri government employers or for private business employers outside aging services as regards COVID-19 vaccination requirements.
