

HB 642 -- Summer School

Sponsor: Cookson

Beginning with the 2011-2012 school year, this bill limits reimbursement for summer school to the attendance hours of students exclusively on academic areas of study based on core subjects of the regular instructional program at the relevant grade levels. A school district must verify to the Department of Elementary and Secondary Education that its hours meet the requirement. A district may operate nonacademic or enrichment summer programs at its own expense.
