

HB 949 -- City Economic Development Tax Boards

Sponsor: Ellinger

This bill increases from five to seven or nine the number of members on an economic development tax board established by a city. The school district and the county will each appoint an additional member and, if it is a nine-member board, the city will appoint two additional members. If a board is already in existence, any increase must be designated in an order or ordinance. The bill also specifies the terms and election cycle for appointing the additional members.
