

## HB 1013 -- Labeling of Food

Sponsor: Hughes

This bill requires any food or food product sold in Missouri which contains antibiotics, rBGH, growth hormone treatment, bovine somatotropin, oestradiol, progesterone, testosterone, zeranol, trenbolone, or melengestrol acetate to be labeled indicating that it contains the substance. Any food or food product sold in Missouri which contains any product or by-product of any genetically manipulated material from a plant or animal treated to change the plant or animal's DNA or has been treated with radiation or pesticides found to be harmful when ingested by humans must also be labeled indicating that it contains the product or by-product.
