

HB 2105 -- Emergency Vehicle Access to Gated Communities

Sponsor: Meadows

This bill allows the governing body of any county or municipality to enact an order or ordinance that requires each electronic gate to a gated community or multiunit housing project to be equipped with a county fire marshal-approved gate-operating device that activates at the sound of an emergency vehicle siren. If an order or ordinance is established, it must be enforced by the appropriate fire department, fire protection district, or volunteer fire protection association for the jurisdiction.
