

HB 902 -- REMEDIAL EDUCATION IN VIRTUAL SCHOOLS

SPONSOR: Curtis

By July 1, 2016, this bill requires each school district or charter school to develop a policy and system for identifying high school students in immediate need of remedial coursework. In order to prepare the identified students for future high school success or college- or entry-level careers, each district or charter school must implement a virtual program for these students by the beginning of the 2016-17 school year. The virtual programs must be funded as provided under current law.
