

HB 1077 -- PAIN MANAGEMENT CLINICS

SPONSOR: Swan

The bill defines a "pain management clinic" as a privately owned clinic, facility, or office where a licensed health care provider provides chronic nonmalignant pain treatment to a majority of its patients for 90 days or more in a 12 month period or a privately owned clinic, facility, or office that advertises for pain management services.

This bill requires any pain management clinic not affiliated with a hospital to be owned by a state licensed physician that is board certified in pain management.
