

HB 1085 -- SCHOOL EMPLOYEE RETIREMENT SYSTEMS

SPONSOR: Lair

This bill modifies the provision allowing retired teachers to work for a school district on a part-time or temporary-substitute basis not to exceed a total of 550 hours in any one school year with compensation of up to 50% of the annual compensation payable under the district's salary schedule for the position or positions filled by the retiree.

Any person must contribute to the retirement system, if he or she satisfies the retirement system's membership eligibility requirements and will apply to any individual retired and currently receiving a retirement allowance under Sections 169.010 to 169.141, RSMo, other than for disability, who is employed by a third party or is performing work as an independent contractor if he or she is performing work in a district included in the retirement system as a temporary or long-term substitute teacher or in any other position that would normally require an individual to be duly certificated under the laws governing the certification of teachers in Missouri if he or she is employed by the district.

The retirement system may require the district, the third-party employer, the independent contractor, and the retiree to provide documentation showing compliance with these provisions of law. If the documentation is not provided, the retirement system may deem the retiree to have exceeded the limitations provided.
