

HB 2388 -- YOUTH SPORTS BRAIN INJURY PREVENTION

SPONSOR: Fitzwater (144)

This bill requires any municipality, business, or nonprofit organization that organizes a youth athletic activity where an activity fee will be charged to distribute a concussion and brain injury information sheet to each athlete participating in the activity. Each athlete's parent or guardian must sign the information form and submit it to the athletic activity governing body before the athlete may participate in the activity.

This bill further specifies that all coaches participating in the activity are required to complete initial on-line or in-person training and must receive updated training at least once every three years thereafter.
