## FISCAL ANALYSIS

### ASSUMPTION

Officials at the **Office of Administration Division of Budget and Planning (B&P)** assume this proposal would change Article IV, Section 30(a) of the Missouri Constitution. The proposal shall be submitted to qualified voters during the General Election in November, 2018 or at a special election. If approved, the changes shall become effective January 1, 2019.

This proposal would increase the fuel taxes to \$0.27 per gallon. B&P notes that it appears this rate increase would apply to gasoline, diesel, and alternative fuels.

Based on FY 2017 motor fuel tax collections of \$715.0 million, B&P estimates that 4,205.9 million gallons of motor fuel were taxed. Using this estimate, B&P calculates that a total increase of \$0.10 on the motor fuel tax will generate \$420.6 million in revenue.

Based on FY 2017 collections of \$183,000 for compressed natural gas/propane and \$141,000 for liquefied natural gas, B&P estimates that a total increase of \$0.22 on the alternative fuels could generate up to \$1.4 million in revenue. B&P notes that under this proposal, taxpayers could still purchase an alternative fuel decal rather than pay the fuel tax at the pump.

Based on these calculations, B&P estimates the increased taxes will generate \$146.9 million in for the State Road Fund in FY 2019 and \$293.8 million in FY 2020 and thereafter. The increased tax will also raise local funds of \$64.2 million in FY 2019 and \$128.2 million in FY 2020 and thereafter.

This proposal requires voter approval; therefore, neither Total State Revenue nor the calculation under 18(e) would be impacted.

Officials at the **Department of Revenue (DOR)** assume if passed by voter approval, this proposed legislation could potentially increase state revenues by \$143,745,000 in FY 2019 and \$287,490,000 each year thereafter.

Fiscal Year	Impact
FY 2019	\$143,745,000
FY 2020	\$287,490,000
FY 2021	\$287,490,000

ASSUMPTION (continued)

DOR's Excise Tax requires one Revenue Processing Technician I (\$26,340) for the increased review of the motor fuel refund claims. Excise Tax requires one Revenue Processing Technician I (\$26,340) for the increase in reporting and registration what would be required. Additionally, the integrated tax system would need updates costing \$75,168.

**Oversight** will show the impact of the computer changes and FTE in the fiscal note.

Officials at the **Office of the Secretary of State (SOS)** assume that each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo requires the state to pay the costs. The cost of the special election has been estimated to be \$7.8 million based on the cost of the 2016 Presidential Preference Primary.

The Secretary of State's office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. The Secretary of State's office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with \$1.3 million historically appropriated in odd numbered fiscal years and \$100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 the Secretary of State's Office was appropriated \$2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost \$2.4 million to publish (an average of \$400,000 per issue). The Secretary of State's office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, we reserve the right to request funding to meet the cost of our publishing requirements if the Governor and the General Assembly again change the amount or continue to

ASSUMPTION (continued)

not designate it as an estimated appropriation.

**Oversight** has reflected in this fiscal note, the state potentially reimbursing local political subdivisions the cost of having this joint resolution voted on during a special election in fiscal year 2019. This reflects the decision made by the Joint Committee on Legislative Research, that the cost of the elections should be shown in the fiscal note. The next scheduled statewide primary election is in August 2018 and the next scheduled general election is in November 2018 (both in FY 2019). It is assumed the subject within this proposal could be on one of these ballots; however, it could also be on a special election called for by the Governor. Therefore, Oversight will reflect a potential election cost reimbursement to local political subdivisions in FY 2019.

Officials at the **Missouri Department of Transportation** defers to the Department of Revenue for fiscal impact.

**Oversight** notes the five year average number of gallons of motor fuel sold is 4,178,751,108. Oversight notes the money in the Motor Fuel Tax Fund (0673) is distributed 15% to cities, 12% to counties, and the remaining 73% to the State Road Fund. Oversight will show the estimate provided by B&P.

Since this proposal requires a vote of the people in order to be implemented, **Oversight** will show the impact in the fiscal note as \$0 (not approved by the voters) to the estimated impacts listed above.

FISCAL IMPACT - Small Business

Small businesses the purchase motor fuel would be impacted.

FISCAL DESCRIPTION

Upon voter approval, this proposed Constitutional amendment would increase the existing fuel tax from 17 cents per gallon to 27 cents per gallon. The funds are distributed in the same manner as required under current law.

The bill has an effective date of January 1, 2019.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
