

HB 1998 -- COMPREHENSIVE STATE ENERGY PLAN (Bondon)

COMMITTEE OF ORIGIN: Standing Committee on Utilities

This bill requires the Missouri Division of Energy to review the comprehensive state energy plan implemented by the division by January 1, 2020. The plan shall be reviewed biennially thereafter to ensure certain listed goals and updated as needed. The division shall use a diverse stakeholder input system either directly or by contracting with a qualified organization, and issue a report along with each review, suggesting policy changes.

In addition to reviewing the state energy plan, the division shall also issue a report detailing any special rates that are approved for aluminum or steel manufacturers, or other facilities with a monthly energy load of at least 50 megawatts, and any resulting economic impacts from those special rates.

This bill is similar to SB 727 (2018) and HB 661 (2017).
