

HJR 102 -- TOLL ROADS

SPONSOR: Corlew

Upon voter approval, this proposed Constitutional Amendment authorizes the use of toll roads with rates approved by the Missouri Transportation and Highways Commission for the limited purpose of managing congestion on highways in metropolitan areas via the use of toll bridges or toll lanes. As in the case with many other road funds and transportation funds, revenues from tolls will not be defined as total state revenues, new annual revenues, or expenses of state government under Article X of the Constitution of Missouri.
