

HB 514 -- IN-PERSON INSTRUCTION

SPONSOR: Basye

This bill requires any school district that does not offer an in-person option as the sole method of instruction for students to provide an education voucher to help defer the expenses of providing in-person instruction in an alternative setting. The educational voucher will be a prorated portion of the per-pupil state adequacy target, based on the percent of hours the school district did not offer an in-person instruction option.
