

HB 755 -- COMMUNICABLE DISEASES

SPONSOR: Christofanelli

This bill modifies the laws regarding Human Immunodeficiency Virus (HIV), and applies the law to all serious infectious or communicable diseases instead of only HIV. A serious infectious or communicable disease is a non-airborne disease spread from person to person that is fatal or causes disabling long-term consequences in the absence of lifelong treatment and management.

It shall be a class D felony for a person knowingly infected with a serious infectious or communicable disease to be a blood, organ, sperm, or tissue donor, except as deemed necessary for medical research or deemed medically appropriate by a licensed physician; or to knowingly expose another person to a serious infectious or communicable disease through an activity that creates a substantial risk of transmission as determined by competent medical or epidemiological evidence. If the victim contracts a serious infectious or communicable disease, it is a class C felony. It shall be a class A misdemeanor for a person knowingly infected with a serious infectious or communicable disease to act in a reckless manner by exposing another person to a serious infectious or communicable disease through an activity that creates a substantial risk of transmission as determined by competent medical or epidemiological evidence.

It is an affirmative defense if the person exposed to the serious infectious or communicable disease knew that the infected person was infected and consented to the exposure with such knowledge.

When alleging a violation of the law against exposing another person to a communicable disease, the prosecuting attorney or grand jury must use a pseudonym to protect the victim of the crime.

This bill makes the crimes of offense of endangering a corrections employee and offense of endangering a Department of Mental Health employee apply to prisoners who are knowingly infected with any serious infectious or communicable disease and exposes another person to the disease. Currently, the law only applies to exposing the victim to HIV, Hepatitis B, or Hepatitis C.

This bill is similar to HB 1691 (2020) and the same as HCS HBs 167 & 166 (2019).
