I install LED lighting on Motorcycles all the people state that the main reason they install the LED lighting on there motorcycles is to be better seen at night because motorcycle are not see real good and they are a small target. With the LED lit they stand out better and are seen better in low light conditions. IT IS A SAFETY ISSUE.

I, Joe Widmer, Freedom of Road Riders Legislative Coordinator, support this legislation. We would like to see this law passed because it will help make motorcyclists more visible, especially at night. It would also allow them to make their motorcycle more personal and unique. But the main thing is that it would make a motorcyclist more visible to motorists. Hopefully, it would be eye catching and reduce collisions between motorcyclists and other traffic. Thank you.

As a motorcyclist I feel it is very important to make my bike as noticeable as possible when on the road. Motorists tend to not see us coming as we ride on the road as we are smaller than a car. Anything that will help make us stand out as we ride and give motorists as much visibility as possible benefits all of us on the roads. Adding light bars of various colors draws attention. When a vehicle is driving down the road with different colored lights, it stands out.
