<b>THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.</b>			

I strongly support HB1475. Medical history of children, should not be disclosed to any education entities in order to access education. Discrimination of children based on parent's or personal medical choices in order to gain education is against the law. Requirement for any individual to be vaccinated against COVID-19 for employment or participation at a school, university or other institution violates federal law 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(III), which requires that the person to whom an EUA vaccine is administered be advised, "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." The reason for the right of refusal stems from the fact that EUA products are by definition experimental. Phase III clinical trials for the Pfizer vaccine do not end until May 2, 2023 and for the Moderna vaccine until October 27, 2022. EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is "absolutely essential." BioNTech received FDA approval for people ages 16 and above under the name Comirnaty, but there are no Comirnaty doses available in the United States; therefore there is currently NO FDA approved COVID-19 injection available anywhere in the United States. Every COVID shot in America remains under the EUA law and thus people have the "option to accept or refuse". It is typical for vaccines to be in clinical trials for 6-10 years before licensure ; COVID vaccines have been in trials for a matter of months. We do not have long-term safety data, and the short-term data indicate alarming injury and death rates, unprecedented for any other licensed vaccine. The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates.

As a parent of two high schoolers, I am asking you to please support any and all legislation that prohibits workplaces, school districts, public schools, and institutions of higher education along with their employees from requiring any employee or student to receive a COVID-19 vaccine or gene therapy treatment in order to be physically present at any events, premises, or facilities. Additionally, a vaccine may not be required as a condition for employment or for acceptance as a student. In addition, I want to make sure that school districts can not test my child for Covid-19 without my written consent. Thank you.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

Members of the Missouri House of Representative Judiciary Committee Thank you for allowing the Freedom Principle STL the opportunity to submit this testimony in support of the following legislation: HB 1544, HB 1635, HB 1475. All are in support of prohibiting employers, school districts and governments from implementing or requiring vaccine mandates as a condition of employment or attendance. In addition, The Freedom Principle STL would like to offer support for HB 1617, which precludes any entity from requiring any person to undergo or provide proof of vaccination to enter any facility or venue or access to transportation services. Earlier this month the U.S. Supreme Court ruled against the Biden Administration saying OSHA could not mandate large employers with more than 100 employees to force employees to get the COVID-19 vaccination. While this was a victory for individual medical freedom, the battle front has now shifted to the state level. As of right now, any Missouri employer of any size, school district or local government can still mandate an employee, student or resident get the COVID-19 vaccination as a condition of employment, attendance or to use government services. This means an employee can still be fired if they choose not to get vaccinated. For public schools or institutions of higher learning, employees and/or students can be forced to get the vaccination or be restricted from being able to work or attend school or school functions. Under the current situation, governments may continue to abuse their Emergency Powers to require vaccinations to access government services or potentially receive government benefits. What is even worse, is the Equal Employment Opportunity Commission (EEOC) has said this is NOT a violation of an individual's civil rights. During the last two years, Missourians have seen government bureaucrats, big tech oligarchs, the legacy media, and many politicians dictate what we should believe and how we should act. In these last two years Missourians have had the following rights and freedoms taken from us:

Gathering with families and friends • Visiting a loved one in the hospital when they are sick or dying • Operating a business if deemed "non-essential" by a government bureaucrat • Flying on a plane, riding on a bus or train without a face covering • Medical autonomy (get the jab or else) • Participation in the "public square" for "wrong-think" Nowhere in the Declaration of Independence or the U.S. Constitution does it put the interests of government or businesses ahead of the individual. This is what will happen if the Missouri Legislature does not take immediate action to prohibit employers, schools, and local governments from requiring vaccinations of their employees, students, and/or citizens. Each of these pieces of legislation pertain to various areas of employment, public health and education. But the underlying intent of these bills is "Individual Freedom." This is why we believe all three are equally important and must be acted upon by the Missouri Legislature. Furthermore, in addition to supporting these three bills, we also support HB 1617. This bill "precludes any entity from requiring any person to undergo or provide proof of receiving a vaccination for COVID-19, influenza or any other diseases for which a vaccination was not required by

January 1, 2020.” Just like Americans fought to eliminate segregation in the 1960’s, the Freedom Principle STL stands against any institution, business or person from discriminating against any customer or person based on sex, gender, creed, age and now vaccinated status. The Freedom Principle STL believes individuals must have the right to make their own medical decisions and they shouldn’t be restricted from entering a venue, restaurant, government agency, public service or place of worship because they choose to not get a COVID-19 vaccination. In closing, we understand many republicans claim to be “pro-business” and prefer to let a business mandate their employees if they choose this for their business. Many in the legislature are supportive of making an employer or institution, who forces vaccines accountable for damages should one of their employees suffer side effects from the vaccination. It is not clear how that would even work. Would it fall under the Workers’ Compensation Act? Would an employee have to sue? We believe this type of liability is not good enough to protect employees, student and/or citizens. This is why we support HB 1544, HB 1635, HB 1474 and HB1617. Throughout this pandemic, Missourians have suffered personal loss of freedoms, personal loss of loved ones and some have lost their businesses. We don’t believe a person should have to choose between their job or their personal medical freedom. We believe individual medical freedom must come before business rights. Respectfully, Byron Keelin  
President – Freedom Principle STL

Vaccine mandates are absolutely anti American. They are also a fast tracked approach to giving government entities carte blanche for requiring any medical procedure regardless of circumstance. It is particularly wrong, and gross, and terrifying to make children have to endure unnecessary medical procedures in order to learn or socialize. Please make it stop.

What has been happening in our country and in many other parts of the world in the name of health and science is a tragedy and we have only as of yet begun to taste the bitterness of said tragedy. Further steps down this path will only ensure more death and increased and unnecessary suffering. Please vote to protect individuals against the tyranny of the government in imposing or allowing others to impose a pharmaceutical tyranny which is actively coming between a person and their health care advisor. No person should be forced to give up rights, submit to invasive procedures or be otherwise coerced against their will to submit to any medical procedure, not least of which to those of us with natural immunity and especially those of us with a history of adverse reactions to pharmaceuticals. Please help ensure that courageous doctors who have bravely stood up against captured entities wishing to take away their licenses for acting in their patient's best interest will not continue to face persecution. Please help stand for nurses who have seen first hand the dangers these so-called "safe and effective" "vaccines" pose to those who take them, a vaccine so lacking in immune-inducing responses that the definition itself had to be changed in order to call them as such. Are we to gaslight and ignore the very people we are told to trust with our health that they do not know and can make decisions as to what is in the best interest of their own body and health? Please help children not be ostracized by being subjected to forced quarantine and isolation from classmates and teachers, even when healthy and testing negative, simply because they were not subjected to a gene therapy injection of which we have zero long term safety studies. We have long known that children were not the drivers of the pandemic and that children are by far less at risk from an unhealthy outcome from the virus as they are from either the vaccine or the devastating psychological, social and spiritual effects of policies made in response to the pandemic. Please stop testing and quarantining healthy individuals, yet forcing sick vaccinated doctors and nurses back to work. ("Stressed hospitals are asking workers with covid to return — even if they may be infectious" <https://www.washingtonpost.com/health/2022/01/23/hospital-workers-covid-isolation-cdc/>) If this were all about health and safety, why are the healthy unvaccinated not allowed to work, but the sick vaccinated are being forced back into the very places that say they are striving to save the most vulnerable among us? Furthermore, have we learned nothing from history? We have thrown all we know out of the window and blinded ourselves to any solution save the one and only one. Why? How many individuals must be sacrificed to achieve a non-existent (by definition) medical Utopia? Where are our protections to life, liberty, and the pursuit of happiness, freedom from coercion from forced medical experimentation as stated in the Nuremberg Code, and the universal standards in ethics as found in the Universal Declaration on Bioethics and Human Rights? Need one only create the right atmosphere of fear in which to manipulate the masses in order to throw out all that is good, all that we have learned from mistakes in the past, and all that we had hoped to prevent as mistakes for the future? Finally, quashed information and purposeful lack of collecting pertinent data has lead many to

make choices that have otherwise left them having been harmed, with no liability protections against those forcing them to undergo the procedure. Science publishing and pharmaceutical misdeeds were prevalent long before the pandemic. The tragedy here lies in government policies which forced people to have less than desirable outcomes, whether by not allowing treatments which work, by giving treatments that cause harm, by skipping steps in the regulatory process, or by forcing a one size fits all medical procedure that was improperly tested on to millions of people worldwide. We need to stop this madness post haste. Thank you for your consideration.

I write in strong support of HB 1475 and 1624 I strongly support preventing covid "vaccine" gene therapy requirements for ANY individual in our state - especially our children. These covid gene therapies are improperly labeled as vaccines. They should not be required for anyone! If you are not aware of these facts, please review Senator Ron Johnson's Jan 24 (5 hr) panel discussion entitled Covid - a Second Opinion. Missouri representatives have a responsibility to educate themselves on the facts, outside of the media propaganda machine, in order to make wise discussions concerning the health of Missourians. Protect our rights to make health decisions! Do not be deceived.

I am in support of any bill that bans schools, businesses, venues or public transportation from requiring vaccination, proof of vaccination, vaccination "passports" or any requirement such as proof of natural immunity as a condition of employment or attendance. Personal health information is just that - very personal and private and should never be required to be shared. I am also in support of any bill that bans schools from endorsing, providing or otherwise having any involvement in any vaccination or medical treatment. Businesses and schools should not ever have the power to infringe upon my personal health decisions or the health decisions of my children. If we cannot have control over our own medical decisions and the right to decide what medical treatments or vaccinations we will participate in, then we lose all rights to our bodies and become prisoners of the state.

I am also in support of any bill that bans schools from endorsing, providing or otherwise having any involvement in any vaccination or medical treatment. Businesses and schools should not ever have the power to infringe upon my personal health decisions or the health decisions of my children. If we cannot have control over our own medical decisions and the right to decide what medical treatments or vaccinations we will participate in, then we lose all rights to our bodies and become prisoners of the state.

This bill would be even better if it was effective with the current school year! No individual should be required to accept any medical intervention (much less this genetic experiment that they call COVID-19 vaccines, that are unproven as to their safety or effectiveness) in order to gain access to public education or institutions of higher education, or their events & facilities that were previously accessible to all; or to be employed by those institutions. Requiring vaccination for COVID-19 would NOT provide any assurance that the individual is not a threat to public health, since as we are seeing, the vaccines prevent neither infection nor transmission.

I am writing in support of this bill. I am a parent of 2 children in public school. As a parent I would like to have the right to decide if I want my children to be vaccinated. I firmly believe this is my right as a parent and it's a conversation I would like to have with our pediatrician and not the schools. I look to our pediatrician for guidance in health related matters; not the school.

I wholeheartedly support this bill! This vaccine is still under emergency use authorization in Children. It has not been approved by the FDA. We don't truly know the potential long term effects of this vaccine either. I see no benefit for a school district to mandate it as it has been proven that it doesn't reduce infection or transmission. The vaccine isn't needed for this age group since they have extremely low risk from complications/death.

I am in support of any bill that bans schools, businesses, venues or public transportation from requiring vaccination, proof of vaccination, vaccination "passports" or any requirement such as proof of natural immunity as a condition of employment or attendance. Personal health information is just that - very personal and private and should never be required to be shared. I am also in support of any bill that bans schools from endorsing, providing or otherwise having any involvement in any vaccination or medical treatment. Businesses and schools should not ever have the power to infringe upon my personal health decisions or the health decisions of my children. If we cannot have control over our own medical decisions and the right to decide what medical treatments or vaccinations we will participate in, then we lose all rights to our bodies and become prisoners of the state.

I strongly support HB1475. Medical history of children, should not be disclosed to any education entities in order to access education. Discrimination of children based on parent's or personal medical choices in order to gain education is against the law. Requirement for any individual to be vaccinated against COVID-19 for employment or participation at a school, university or other institution violates federal law 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(III), which requires that the person to whom an EUA vaccine is administered be advised, "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." The reason for the right of refusal stems from the fact that EUA products are by definition experimental. Phase III clinical trials for the Pfizer vaccine do not end until May 2, 2023 and for the Moderna vaccine until October 27, 2022. EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is "absolutely essential." BioNTech received FDA approval for people ages 16 and above under the name Comirnaty, but there are no Comirnaty doses available in the United States; therefore there is currently NO FDA approved COVID-19 injection available anywhere in the United States. Every COVID shot in America remains under the EUA law and thus people have the "option to accept or refuse". It is typical for vaccines to be in clinical trials for 6-10 years before licensure ; COVID vaccines have been in trials for a matter of months. We do not have long-term safety data, and the short-term data indicate alarming injury and death rates, unprecedented for any other licensed vaccine. The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates.

As the bill sponsor often voices his Party's mantra of "local control" I suggest he actually take his own advice. Local public schools have school boards. Members of school boards write the policies for their district. Policies including but not limited to vaccine mandates. The school board members are elected by the people who reside within the boundaries of the school district. The very definition of local control. (Representative Schroer might need some help with understanding the concept of living within a prescribed boundary.) The idea that people elect public servants who then make policies in that community is a concept one would think a "defender of liberty" like Representative Schroer could support. But, alas, this isn't really about local control (is it ever?) and this isn't about vaccines, either. It's about a man who wants to proclaim "liberty" to our face but legislate the very opposite by taking away the power of the people who elect the public servants (see also- prosecuting attorneys.) Notice who Representative Schroer targets with his various legislation. It's not communities or entities he agrees with, is it? Nor is it communities or entities under his jurisdiction. (Again, the Representative may need a little help.) I'm not certain who, if anyone reads these written testimonies. However, if you're a legislator on the fence on this issue, I ask that you consider who is behind this particular bill and take the time to think critically about his motives. Thank you for your time.

I strongly oppose this bill. Vaccines and disease testing are important elements of public health. This bill would completely undermine the ability of a school district or health department to protect employees, students and the public from highly contagious diseases that cause long term health issues, even death. A sick child cannot learn, a sick teacher cannot teach, a sick community cannot produce. Our state legislature should be working for the public good. This bill is the opposite of what is good for public health in Missouri.

<b>THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.</b>			

Good morning, Representative Evans and members of the House Judiciary Committee. My name is Laura Turner. I am the Senior Manager, Advocacy - Missouri and Arkansas, for the American Lung Association. The American Lung Association is offering testimony in opposition to HB 1475. The American Lung Association is the nation's oldest voluntary public health organization with a mission to save lives by improving lung health and preventing lung disease. We do this through education, advocacy, and research on behalf of the 36 million Americans living with lung diseases including lung cancer and COPD. When we found ourselves in the midst of a respiratory pandemic in 2020, the American Lung Association knew we had an important role. We launched a \$25 million campaign to end COVID-19 and defend against future respiratory virus pandemics, funding research awards and grants for preventative research as well as working to evaluate the effects of COVID-19 on patients with chronic lung disease. We have worked in coalition with government, private industry, and public health organizations to address this pandemic on every level. Throughout our nation's history, vaccinations have been an important tool to save countless lives and eradicate deadly disease from smallpox to the flu and now they are an important tool to help us address the pandemic we face today. In a pandemic, time is measured in lives lost and people left with severe, debilitating health effects. The sooner every Missourian and American gets fully vaccinated, the better chance we stand of ending the pandemic and moving our state and nation forward. If passed, this bill will derail our efforts and threaten the health of the 1,082,000 Missourians living with lung disease. Our public policies should focus on ensuring everyone is vaccinated. Over 206 million people in the United States are fully vaccinated, and billions of people worldwide have received a COVID-19 vaccine (1). The vaccines have undergone the most intensive safety monitoring in U.S. history and claims that they are not extensively tested are false. The evidence is clear that they reduce the risk of hospitalizations and deaths from COVID-19, as well as the risk of contracting and spreading the virus (2). As the trusted champion for lung health, the American Lung Association is focused on slowing the spread and defeating COVID-19. To further protect the overall population and those most vulnerable, we need a sufficiently high proportion of the population to get vaccinated to stop coronavirus transmission. We hope you will work to protect the health and safety of all Missourians by encouraging everyone to get vaccinated and boosted and reject policies that slow the uptake of vaccinations and spread false information about their safety. For those reasons we strongly urge you to oppose HB 1475.1.

Vaccinations are NOT new. They have been required in educational settings for decades! You are tying the hands of the communities trying to keep us from spreading a deadly disease that is inundating our hospitals for no reason. This type of legislation is causing major increases in the premiums of our health and life insurance-not to mention forcing teachers and parents to live with educational systems full of disease. Covid19 vaccinations are safe and effective and the appropriate exclusions should apply, but wholesale stoppage of vaccination requirements takes us back to the 1800s.

Chairman Evans, Vice-Chairman Veit, members of the committee; thank you for the opportunity to submit testimony today in opposition to HB 1475 which seeks to intimidate Missouri schools and employees out of taking measures to protect themselves and their families, and to further overcrowd the strained legal system with politicized law suits during a global and local public health crisis. Pro-Choice Missouri works to protect and expand every Missourian's right to bodily autonomy, to access essential reproductive healthcare, to access accurate information in order to make the best decisions for ourselves and our families, and to parent our children in safety and dignity. Moreover, we work to ensure reproductive justice for all Missourians, which involves advocating to reduce disparities based on race, income level, insurance coverage status, and other factors. Living together in community, as we do here in Missouri, requires each of us to do our part in supporting, uplifting, and protecting that community. The health and prosperity of the community is directly linked to our individual health and prosperity as well as that of our future generations. This bill will particularly impact Missouri communities that are already facing extreme disparities in access to health care, and are in especially vulnerable circumstances due to the COVID-19 pandemic. As community members and leaders, this body should be prioritizing improving the health and well-being of the community and not on politicizing public health measures that have been proven to improve community health. During this unprecedented pandemic, our elected officials should be focused on improving our families' health and safety, not politicizing regard for public health. This bill will have lasting negative impacts on Missouri people, children, and families. Pro-Choice Missouri, representing more than 70,000 members across the state, opposes the advancement of this bill, and urges you to vote NO today.

<b>THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.</b>			

Missouri State Medical Association would like to go on record in opposition of House Bills 1861, 1575, 2093, 1465, 1617, 1485, 1543, 1544, 1769, 2055, 1635, 1665, 1670, 1691, 1692, 1475, 1624, 1904 and 1762. MSMA feels that these bills seek to make it more difficult for employers to adopt a COVID vaccine requirement. Employers, particularly employers within the health care industry, need the ability to require staff to receive a vaccine in order to better protect both the employee and patients. Businesses should have the ability to assess situations and decide.

Requiring vaccinations to attend school is commonplace for school children and has been policy for decades. Missouri children are required to receive DTaP/DTP/DT, Tdap, MCV, IPV, MMR, Hepatitis B, and Varicella. Having a COVID vaccination may be essential for the public health of our communities at some future date and be added to the regular vaccination protocol. This possibility should be provided for by our schools and especially our legislature. It is essential to keep schools in session. Schools have already closed temporarily because they do not have enough teachers or subs to teach classes because they have contracted COVID. The provision of education should be seamless without education gaps and protecting our students with essential vaccinations should be part of it.

**I oppose this big government overreach that would undermine public health and put Missouri's children at greatest risk.**

No mandates or mitigation efforts are needed because we can take care of ourselves and families. We have been doing this long enough. I had to pull my two younger ones from the public school Francis Howell school district because they were full time mask they are now homeschooled. My highschool students were optional until just two weeks ago. My daughter missed almost an entire month of school due to sending healthy kids home for quarantine. This causes large amounts of stress and falling behind in their classes. They went all the way until Dec unmasked then some emergency meeting came up and now they are masked just in time for finals. A coincidence, I think not. Schools need funding for education not masks and vaccines. Anyone who would like to mask or vaccinate has had the option for sometime now. Parents and kids can make their own medical decisions, thank you.

<b>THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.</b>			

In the 1930s, my African American ancestors moved from the Ozarks region to Kansas City in search of greater freedom from discrimination. Even though he was born in 1947, my father still attended segregated schools and for some time experienced other segregated public environments. He was very glad to see segregation end in his lifetime. Last year, I moved back to my ancestral homeland when I moved to the Southern Missouri Ozarks. I wish my great-grandmother could see the kindness with which I've been accepted into my new rural community. I've experienced nothing but friendliness and inclusion in Southern Missouri, and I know that would warm that hearts of my family who were here so long before me. The year 2022 is absolutley not the time to reinstate segregation in education based on vaccine or immunity status. Discrimination is discrimination, and exclusion is exclusion. We don't move forward by reversing all we've achieved in establishing equality.
